### Apache Tomcat

The Apache Tomcat® software is an open source implementation of the [Jakarta Servlet](#) specifications. These specifications are part of the [Jakarta EE platform](#).

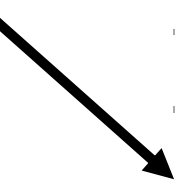

The Jakarta EE platform is the evolution of the Java EE platform. Tomcat 10 and later developed as part of Java EE.

The Apache Tomcat software is developed in an open and participatory environment of the best-of-breed developers from around the world. We invite you to participate.

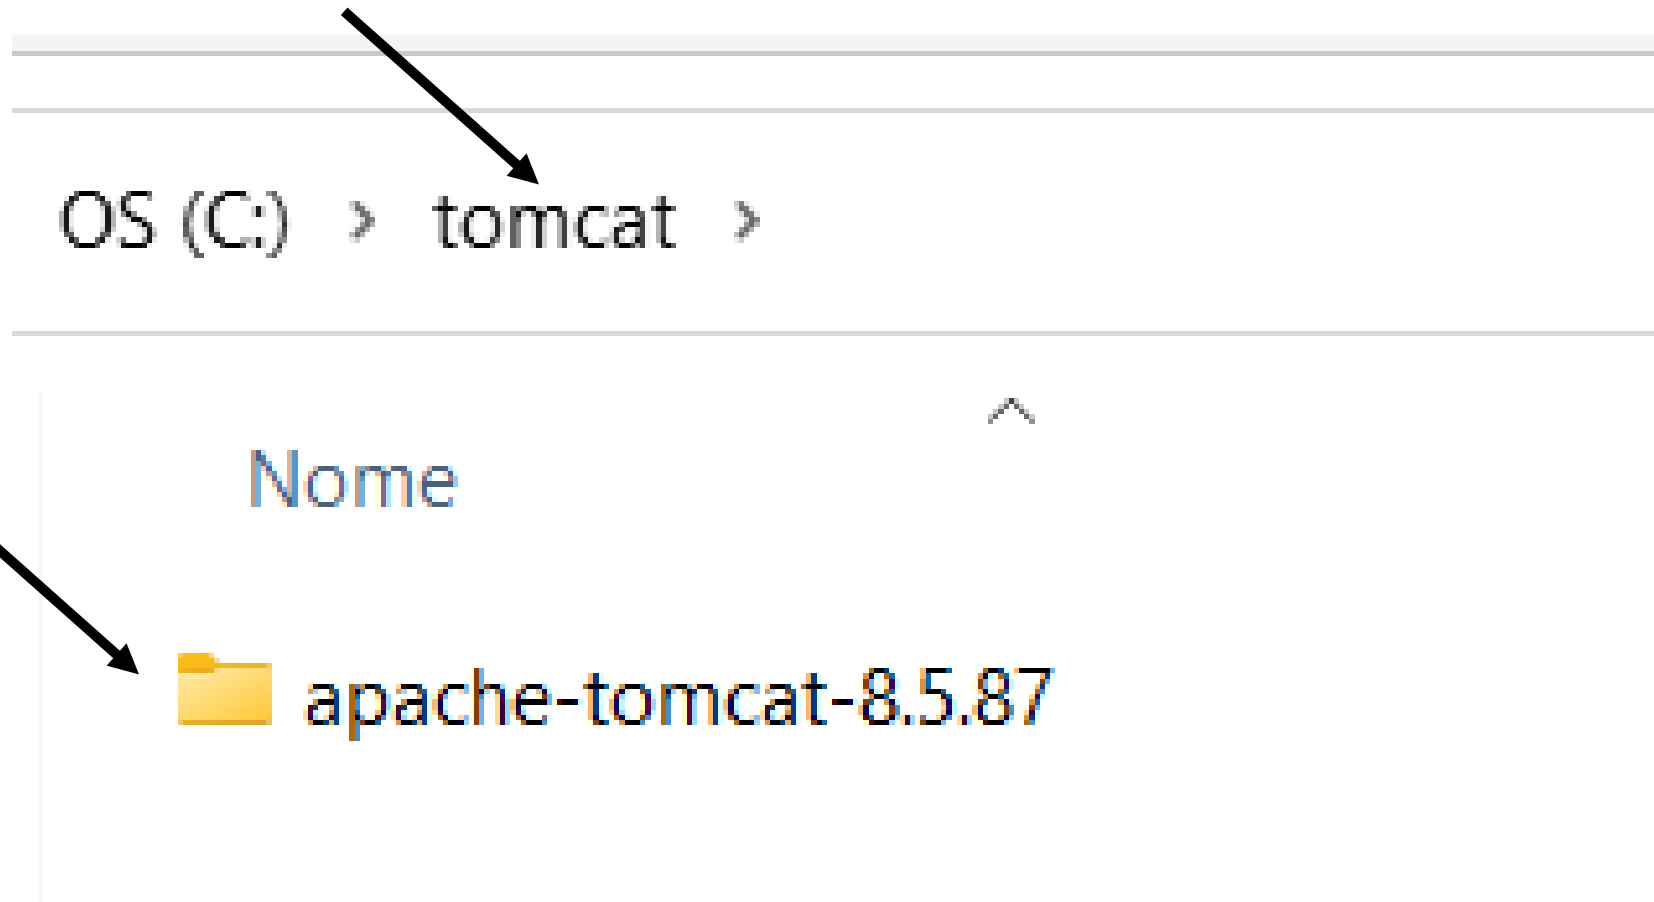

Apache Tomcat software powers numerous large-scale, mission-critical web applications; see the [PoweredBy](#) wiki page.

A screenshot of a Java Swing dialog box titled "Authentication Required" with a close button (X) in the top right corner. The dialog contains the text "Tomcat Manager Application". Below this, there are two input fields. The first is labeled "User Name:" and contains the text "admin", with a black arrow pointing to it from the right. The second is labeled "Password:" and contains five dots, with a black arrow pointing to it from the right. At the bottom of the dialog, there are two buttons: "OK" and "Cancel". A black arrow points to the "OK" button from the right.
